LOCATION

FTC&H
39500 Mackenzie Drive, Suite 100
Novi, Michigan 48377

**REGISTRATION INSTRUCTIONS
CAN BE FOUND ON THE EAST
MICHIGAN AWMA WEBSITE**

emawma.org

WORKSHOP QUESTIONS

Jennifer Calnen
Jennifer.Calnen@GZA.com

Gina McCann of the MDEQ's Saginaw Bay District will provide an overview of the initial and renewal application process, including recent changes to the forms and guidance documents, the benefits of a pre-application meeting, and the administrative and technical completeness process.

Andrew Fadanelli of DTE Energy will share some recent experiences in preparing a complete application and reviewing draft conditions. He will talk about getting ready to complete the application forms and things to look for in an ROP draft permit.

Lillian Woolley, PE, of Fishbeck, Thompson, Carr & Huber (FTC&H) will discuss needing to-do criteria or hazardous air pollutant (HAP) potential-to-emit (PTE) calculations and when you might have to revisit your ROP monitoring. Some good examples of when you might want to propose changes to ROP conditions (and what needs to go through the PTI process) will also be discussed.
